CLASSIFICATION: 06 61 19 QUARTZ SURFACING FABRICATION; 12 36 61.19 QUARTZ AGGLOMERATE (NATURAL QUARTZ AND RESIN COMPOSITE) COUNTERTOPS

PRODUCT DESCRIPTION: Corian® Quartz* materials are comprised of reacted monomers and resins, natural quartz particles, and colorants, and are manufactured in the form of slabs in various gauges. Long-lasting and GREENGUARD and GREENGUARD Gold Certified as a low emitting material, Corian® Quartz surfaces, agglomerated stone, are a high-performance material, delivering strength, and heat and scratch resistance. When properly cleaned, Corian® Quartz does not promote the growth of mold and/or mildew. Corian® Quartz may help contribute to U.S. Green Building Council (USGBC) LEED® points. Most colors of Corian® Quartz are NSF/ANSI Standard 51 Certified for the strictest level – Food Zone. Exposure to any hazards associated with the inputs mentioned is not present in the finished form of Corian® Quartz. The ingredients listed which trigger the associated cancer hazard are inert within the finished form of Corian® Quartz. * (Corian® Quartz formerly known as Zodiaq® Quartz Surface).

VOC CONTENT

VOC Content data is not applicable for this product category.

CERTIFICATIONS AND COMPLIANCE

- VOC emissions: GreenGuard - Gold (previously Children & Schools)
- VOC emissions: GreenGuard - Indoor Air Quality Certified
- LCA: Environmental Product Declaration (EPD) by UL - Industry Generic
- Material content migration: NSF/ANSI Standard 51 - Food equipment Materials
- CONSISTENCY WITH OTHER PROGRAMS
  - No pre-checks completed or disclosed.
Section 2: Content in Descending Order of Quantity

This section lists contents in a product based on specific threshold(s) and reports detailed health information including hazards. This HPD uses the inventory method indicated above, which is one of three possible methods:

- Basic Inventory method with Product-level threshold
- Nested Material Inventory method with Product-level threshold
- Nested Material Inventory method with individual Material-level thresholds

Definitions and requirements for the three inventory methods and requirements for each data field can be found in the HPD Open Standard version 2.1.1, available on the HPDC website at: www.hpd-collaborative.org/hpd-2-1-1-standard

### CORIAN® QUARTZ

**PRODUCT THRESHOLD:** 1000 ppm  
**RESIDUALS AND IMPURITIES CONSIDERED:** Yes

**RESIDUALS AND IMPURITIES NOTES:** Corian® Quartz is comprised of reacted monomers and resins, natural quartz particles, and colorants, and manufactured in the form of slabs in various gauges. Residuals or impurities that may be present in the finished product greater than the inventory threshold indicated have been reviewed and considered by direct testing of Corian® Quartz product or based on Safety Data Sheet information for individual ingredients.

**OTHER PRODUCT NOTES:** Corian® Quartz surfacing material in its final form is an article, is nontoxic and non-allergic to humans.

---

### QUARTZ

**HAZARD SCREENING METHOD:** Pharos Chemical and Materials Library  
**HAZARD SCREENING DATE:** 2019-11-15

**SUBSTANCE NOTES:** Percent range is given due to various colors available. The material inputs for Corian® Quartz (agglomerated stone) product are comprised of reacted monomers and resins, inert mineral fillers, and colorants which are reacted in the manufacturing process thus preventing any exposure of health hazards of the final product. Form-specific hazard for quartz is not expected to apply when this substance is bound in the matrix of the finished product. In its finished form, Corian® Quartz is an article, is nontoxic and non-allergic to humans. Granite, marble, concrete, quartz engineered stone, etc. have silicosis concerns during the production, cutting, polishing and grinding of these types of material dry in the absence water. All of these types of materials are to be cut, fabricated, polished, etc. in the presence of water.

---

### POLYESTER RESIN

**HAZARD SCREENING METHOD:** Pharos Chemical and Materials Library  
**HAZARD SCREENING DATE:** 2019-11-15

**ID:** Undisclosed
SUBSTANCE NOTES: Unsaturated polyester resin is used in the manufacture of engineered stone (agglomerated stone) products. This resin consists of approximately 35 - 40% styrene (CAS 100-42-5) and 60 - 65% unsaturated polyester oligomer (CAS 764-71-6; 107-21-1). Corian® Quartz is comprised of reacted monomers and resins, natural quartz particles, and colorants, and manufactured in the form of slabs in various gauges. The material inputs for Corian® Quartz are encapsulated by polymerization of unsaturated polyester resin in the manufacturing process.

**Certification and Compliance Notes:** Certification is renewed on an annual basis. The renew cycle date is November 7th. Corian® Quartz and accessories have been evaluated under the GREENGUARD certification program since 2006. UL 2818 - 2013 Gold Standard for Chemical Emissions for Building Materials, Finishes and Furnishings: Building products and interior finishes are determined compliant in accordance with California Department of Public Health (CDPH) Standard Method V1.2-2017 using an Office Environment. Commercial furniture and furnishings are tested in accordance with ANSI/BIFMA M7.1-2011(R2016) and determined to comply with ANSI/BIFMA X7.1-2011(R2016) and ANSI/BIFMA e3-2014e Credit 7.6.1, 7.6.2, and 7.6.3 in an Open Plan Office Environment. Products also determined compliant in accordance with California Department of Public Health (CDPH) Standard Method V1.2-2017 in the office environment. Product tested in accordance with UL 2821 test method to show compliance to emission limits on UL 2818. Section 7.1 and 7.2.

CERTIFICATION AND COMPLIANCE NOTES:
Most colors of Corian® Quartz are NSF/ANSI Standard 51 Certified for the strictest level – Food Zone. Certification is renewed annually.

Section 4: Accessories
This section lists related products or materials that the manufacturer requires or recommends for installation (such as adhesives or fasteners), maintenance, cleaning, or operations. For information relating to the contents of these related products, refer to their applicable Health Product Declarations, if available.

DUPONT™ JOINT ADHESIVE
HPD URL: https://hpdrepository.hpd-collaborative.org/repository/HPDs/3675-20150924112509.pdf

CONDITION WHEN RECOMMENDED OR REQUIRED AND/OR OTHER NOTES:
DuPont™ Joint Adhesive is comprised of Component A and Component B. DuPont™ Joint Adhesive for use with quartz and solid surfaces is produced in a range of specific colors to match with Corian® solid surface and Corian® Quartz surfaces. Color-coordinated DuPont™ Joint Adhesive bonds DuPont™ Corian® solid surface with inconspicuous seams. This results in a smooth surface that enables you to create large designs fashioned from a single element.

CORIAN® JOINT ADHESIVE
HPD URL: https://hpdrepository.hpd-collaborative.org/repository/HPDs

CONDITION WHEN RECOMMENDED OR REQUIRED AND/OR OTHER NOTES:
Corian® Joint Adhesive, a methacrylate-based adhesive is non-sagging and thixotropic and provides very good adhesion for Quartz and Solid Surface surfacing materials. CORIAN® JOINT ADHESIVE is available in 50 mL and 470 mL cartridges and a variety of colors which are color-coordinated With Corian® Quartz And Corian® Solid Surface. Corian® Joint Adhesive meets the low VOC emission limit requirements of South Coast Air Quality Management District (SQAMD) Rule 1168. Corian® Joint Adhesive is UL Environment GREENGUARD and GREENGUARD Gold certified.

CORIAN® SOLID SURFACE
HPD URL: https://hpdrepository.hpd-collaborative.org/repository/HPDs/publish_194_Corian_1508450354.pdf

CONDITION WHEN RECOMMENDED OR REQUIRED AND/OR OTHER NOTES:
Corian® acrylic solid surface is a solid, nonporous, homogeneous surfacing material, composed of ≈1/3 acrylic resin (also known as polymethyl methacrylate or PMMA), and ≈2/3 natural minerals. These minerals are composed of aluminum trihydrate (ATH) derived from bauxite. Corian® is an advanced composite product used as an architectural and design material in a variety of applications. Corian® solid surface offers design versatility, functionality and durability. Supplied in sheets and shapes, Corian® solid surface can be fabricated with conventional woodworking tools into virtually any design. In its finished form Corian® acrylic solid surface material is an article, is nontoxic and non-allergic to humans. Corian® solid surface is NSF/ANSI Standard 51 Certified for Food Zone applications, NGBS GREEN CERTIFIED™, and is GREENGUARD GOLD and GREENGUARD certified.

Section 5: General Notes
Corian® Quartz is certified by UL Environment for low chemical emissions in accordance with UL 2818 - 2013 Gold Standard for Chemical Emissions for Building Materials, Finishes and Furnishings. Building products and interior finishes are determined compliant in accordance with California Department of Public Health (CDPH) Standard Method V1.1-2010 using a Classroom Environment. Commercial furniture and furnishings are tested in accordance with ANSI/BIFMA M7.1-2011(R2016) and determined to comply with ANSI/BIFMA X7.1-2011(R2016) and ANSI/BIFMA e3-2014e Credit 7.6.1, 7.6.2, and 7.6.3 in an Open Plan Office Environment. Products also determined compliant in accordance with California Department of Public Health (CDPH) Standard Method V1.1-2010 in the office environment. Product tested in accordance with UL 2821 test method to show compliance to emission limits on UL 2818. Section 7.1 and 7.2, LEED v4.1 Materials and Resources (MR Credit) Environmental Product Declarations (EPD) are now available. DuPont is leading the industry by providing EPDs for Corian® Solid Surface and Corian® Quartz products and contributing towards LEED v4.1 in this Credit category.

The Health Product Declaration (HPD) Open Standard provides for the disclosure of product contents and potential associated human and environmental health hazards. Hazard associations are based on the HPD Priority Hazard Lists, the GreenScreen List Translator™, and when available, full GreenScreen® assessments. The HPD Open Standard v2.1 is not:

- a method for the assessment of exposure or risk associated with product handling or use,
- a method for assessing potential health impacts of: (i) substances used or created during the manufacturing process or (ii) substances created after the product is delivered for end use.

Information about life cycle, exposure and/or risk assessments performed on the product may be reported by the manufacturer in appropriate Notes sections, and/or, where applicable, in the Certifications section.

The HPD Open Standard was created and is supported by the Health Product Declaration Collaborative (the HPD Collaborative), a customer-led organization composed of stakeholders throughout the building industry that is committed to the continuous improvement of building products through transparency, openness, and innovation throughout the product supply chain.

The product manufacturer and any applicable independent verifier are solely responsible for the accuracy of statements and claims made in this HPD and for compliance with the HPD standard noted.
